b. Preliminary analysis of findings in connection with the material obtained in the second phase of this project discloses the possibility of duplication of work between the Correspondents and Records Branch and the Administration and Training Staff. OCI is now preparing division and staff functional statements for our review. A
The Executive Officer expressed reluctance to accept our contention that the Office organizational chart should be revised to place the Production Staff in its proper perspective vis-a-vis the line components which they have agreed to change from staffs to areas. Further discussions will be held with a view of determining to what extent the Production Staff is engaged in pure staff functions and to what extent they are engaged in operating line functions. Upon determination as to the balance of line and staff functions, an attempt will be made to reach an agreement as to the proper charting of the staff.

20. Miscellaneous:

a. Office of Communications [redacted]. While charting the flow of personnel actions in February 1956 in OC, the use of an improvised ditto form for Career Service Board action was observed. Interest in a properly designed form was obtained and a new form was designed, coordinated and identified formally in the Agency forms system. OC reports that the new form is being used satisfactorily.
